

JOB DESCRIPTION: Ready-Mix Driver

DESCRIPTION OF ESSENTIAL FUNCTIONS: Delivers concrete redi-mix to job sites using a truck equipped with an auxiliary concrete mixer. The process begins at the batch plant with the concrete redi-mix driver positioning the redi-mix truck under a loading hopper at the plant where sand, gravel, cement, and water are gravity fed into the auxiliary mixer. From a lever located in the cab of the truck the concrete redi-mix driver starts the mixer and then proceeds to the customers' job site. At the job site the redi-mix driver will attach chutes as needed to the truck. Using a lever the redi-mix driver releases the concrete from the mixer. Once released the concrete material will flow down the chute to an awaiting wheelbarrow or other conveying equipment (pump truck, front end loader, etc.) or directly into the area where the concrete is desired. When all of the concrete material has been offloaded the driver will clean the redi-mix truck using water from a hose to prevent the concrete material from hardening in mixer, the chutes and the truck. If colored concrete has been ordered by the customer the redi-mix driver may add the color directly into the auxiliary mixer or it may be added at the batch plant.

MACHINERY, TOOLS, EQUIPMENT: truck equipped with auxiliary mixer, spray nozzle, water hose, cement chutes, and Purchase Orders.

Concrete Redi-mix Truck

Hose and Spray Nozzle

Purchase Order

EDUCATION, TRAINING, EXPERIENCE: Class DZ required

FOR EACH ACTIVITY LISTED BELOW THERE IS A CHECK MARK IN THE COLUMN THAT BEST REPRESENTS THE TIME THE WORKER SPENDS DOING THE ACTIVITY. TIME IS BASED ON AN EIGHT HOUR WORKDAY "OCCASIONALLY" = 1-33% "FREQUENTLY" = 34-66% "CONTINUOUSLY" = 67-100%
